CHAPTER 2

SCIENCE BEHIND

StellaLife[®] 

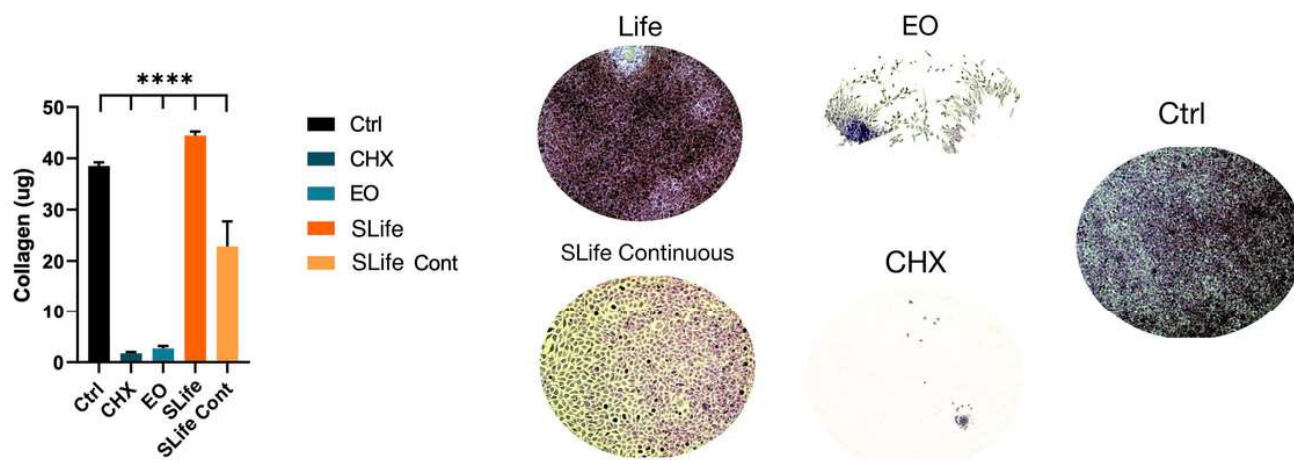

Cytocompatibility Properties of an Herbal Compound Solution Support In vitro Wound Healing

Published: 26 March 2021 Drs. [Peng Zhou](#), [Vanessa Chrepa](#), [Ioannis Karoussis](#), Michael A. Pikos, [Georgios A. Kotsakis](#)

CONCLUSION

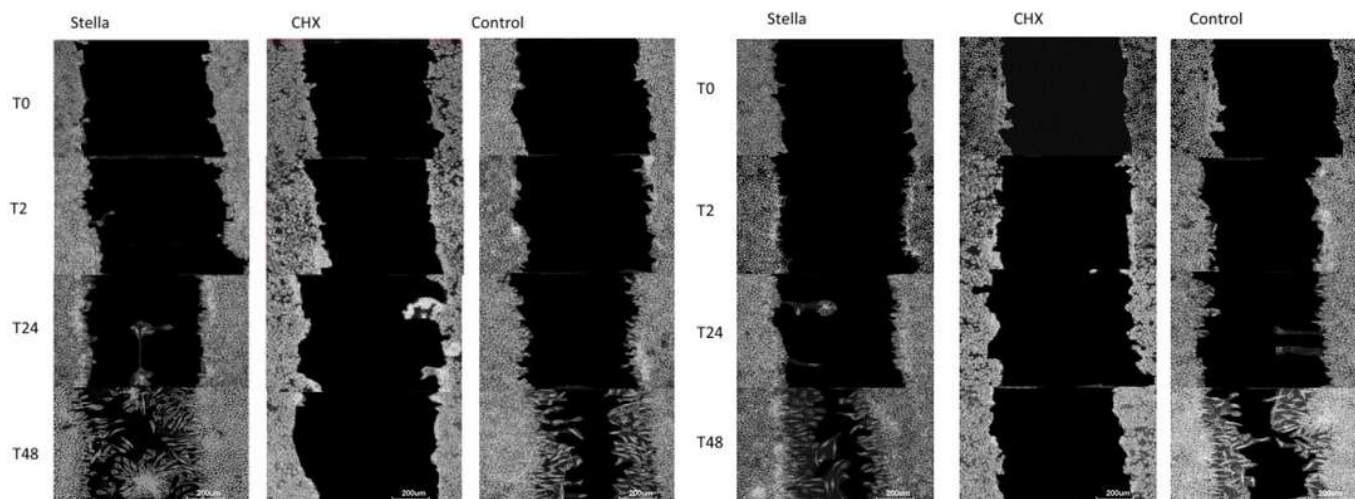

Results of the present study show that an herbal extract compound-based oral rinse did not demonstrate toxicity to fibroblasts and oral stem cells when applied for clinically relevant exposure times. Contrary to currently used oral antiseptic rinses that impaired wound healing as an adverse event, it supported wound healing comparable to control tissue culture conditions. Thus, the potential to improve oral wound healing warrants further investigation in ex vivo models including oral bacteria and in well controlled human studies to assess clinical effects.

Collagen Assay

Representative samples showing total collagen (ruby red stain color) deposition in each group. Areas of cell exfoliation appear as white background.

Scratch wound assay

Images of the scratch wounds at two representative regions of interest for each of three conditions are shown at various timepoints following initial incubation

Cytotoxicity and Gene Expression Changes of a Novel Antiseptic Oral Rinse in Comparison to Chlorhexidine in Gingival Fibroblasts

Published: 17 July 2020 Drs. Masako Fujioka-Kobayashi, Benoit Schaller, Michael A. Pikos, Anton Sculean, and Richard J. Miron

CONCLUSION

The findings from the present study report that the use of VEGA oral rinse was far superior to CHX in terms of cellular biocompatibility, ability to induce cell migration, proliferation, gene expression, and collagen synthesis. We further demonstrated the negative impact of CHX on the cellular inflammatory response of human gingival fibroblasts that may further lead to reported patient pain. Last, we provide support from the basic laboratory that further validates the previous clinical studies supporting the use of the VEGA oral rinse on its superior biocompatibility when compared to CHX.

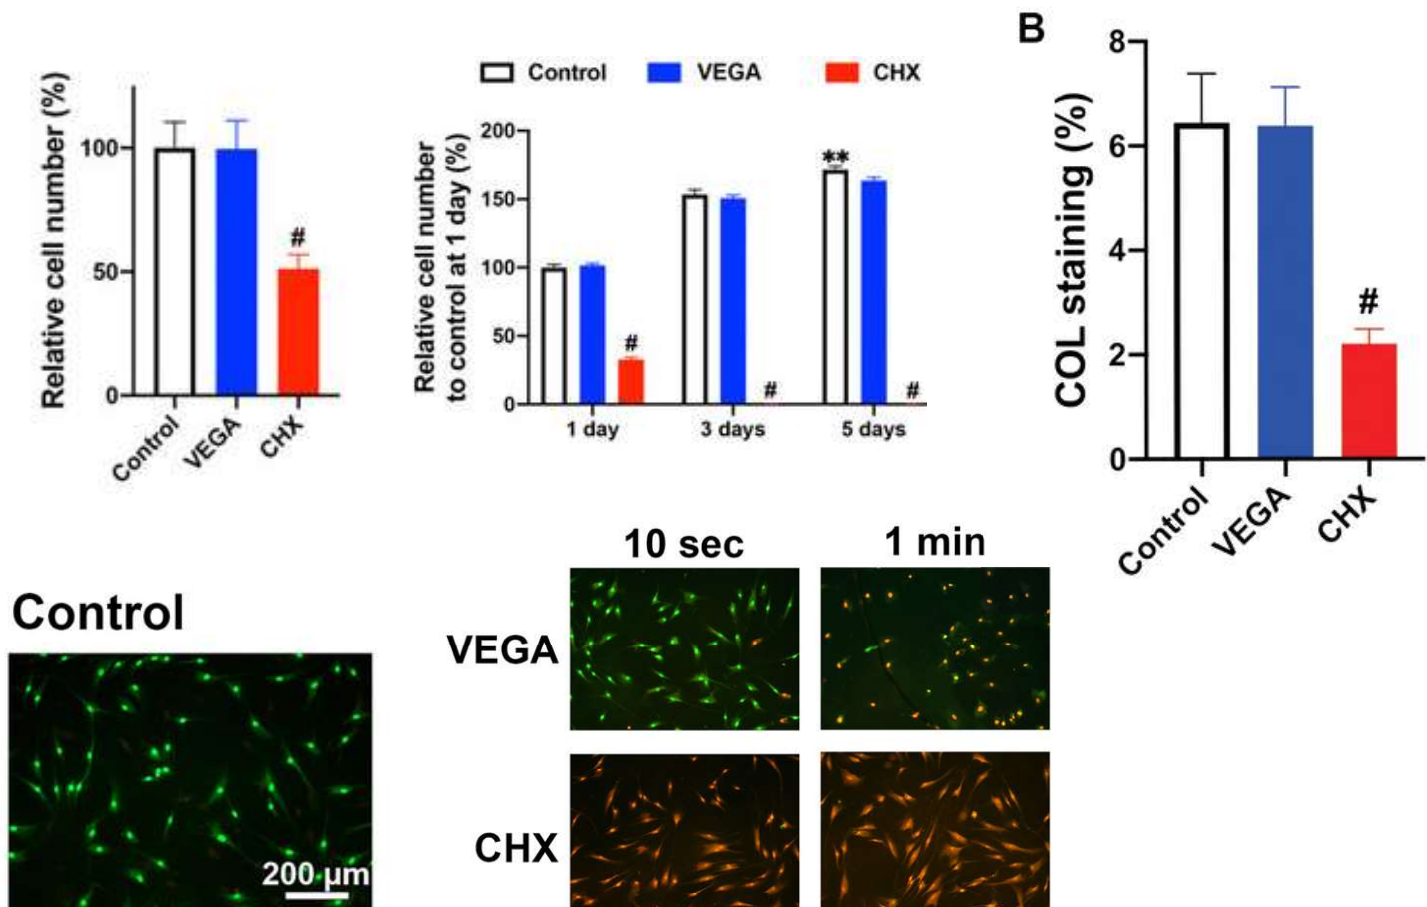

Figure 1. Cell viability of human gingival fibroblasts (HGF-1 cells).

An in-vitro comparison of four antibacterial agents with and without nicotine and their effects on human gingival fibroblasts

CONCLUSION

CHX and PVD demonstrate superior antibacterial properties, but significantly reduce HGF proliferation. AO is bacteriostatic at lower dilutions but is highly toxic to HGFs. EGA was bacteriostatic and demonstrated no detrimental effects on HGF's.

Published:

2 December 2021

- 1- Chlorhexidine (CHX 0.12%)
- 2- Povidone Iodine (PVD 10%)
- 3- StellaLife® VEGA Oral Care Gel (VEGA)
- 4- PerioSciences® AO ProVantage Gel (AO)

BACKGROUND:

To compare anti-bacterial activity of 0.12% Chlorhexidine (CHX), 10% Povidone Iodine (PVD), Vega Oral Care Gel (VEGA), and Antioxidant Gel (AO) on Streptococcus mutans, Streptococcus sanguis, Fusobacterium nucleatum, and Porphyromonas gingivalis with and without nicotine and to evaluate their effects on human gingival fibroblasts (HGFs).

The Efficacy of Preemptive Analgesia Using a Non-Opioid Alternative Therapy Regimen on Postoperative Analgesia Following Block Bone Graft Surgery of the Mandible: A Prospective Pilot Study in Pain Management in Response to the Opioid Epidemic

Published:

Clinical Journal of Pharmacology and Pharmacothreapeutics 2019 - Medtest Publications. 030 2019 Volume 1 Article 1006 Lee, Cameron & Suzuki, Jon. (2019)

PURPOSE:

The authors examined whether a novel alternative treatment regimen that is opioid-free administered preemptively 3 days prior to block bone graft surgery of the mandible has a preemptive analgesic effect on the intensity of pain at the graft harvest site during the 72-hour postoperative period.

CONCLUSION:

The results of the study illustrate that postoperative pain intensity was lower in the group of patients with the opioid-free regimen when used preemptively compared to the group of patients that did not receive the opioid-free regimen. Further, use of this novel treatment alternative in managing postoperative pain resulted in less consumption of opioid analgesic medication and increased the time interval to first use of an opioid analgesic. The results of this pilot study support the need for novel alternative and complementary analgesic strategies.

(A) Clinical photograph of patient without teeth. (B and C) Intraoral view of anterior maxilla restored with implants and zirconia teeth.

Two monocortical blocks of bone harvested from bilateral posterior ascending ramus of mandible four months ago rigidly fixated to maxilla using micro screws now successfully incorporated with maxilla and ready for implant placement. Post-operative pain is most intense at harvest site during first 24-48 hours after surgery.

Improving Periodontal Conditions with Probiotic Treatment

PATIENT:

- 29-year-old female
- Not periodontally stable
- Severe gingival inflammation

TREATMENT:

- StellaLife Pre+Post+Probiotic Kit for 4 months
- Stop aligner treatment
- Remove clear retainer buttons
- SRP

SUMMARY

After 4 months of **StellaLife Pre+Post+Probiotic Kit**, patient continued to have improvement in inflammation, **35% reduction of probing depths, plaque reduction from 50% to 4% and bleeding on probing reduction from 90% to 7%.**

This was even more impressive, considering the addition of traditional braces. The combined treatment protocol of conventional scaling and root planing with a StellaLife Pre+Post+Probiotic Kit proved to be an excellent treatment. Based on my observations, the StellaLife Pre+Post+Probiotic Kit was instrumental in the success of this case.

CLINICIAN'S FEEDBACK

[Read More](#)

"The feedback from patients has been tremendous. The dramatic change we have seen has been very impressive. We now have patients asking us for more StellaLife..."

- **Dr. Michael A. Pikos, FL**

"StellaLife was one of the first antiseptic solutions, compared to CHX, increase over tenfold cell viability, improve collagen, TGF."

- **Dr. Rick Miron, FL**

"I performed a series of case reports... healing took only 1 week in comparison to 1 month on the controlled side.. We have yet to uncover the limitations of this product."

- **Dr. Jason Stoner, OH**

"...Significant reduction in our patients' post-operative pain, discomfort, swelling...enhanced wound healing. We couldn't imagine practicing without StellaLife."

- **Dr. Jennifer Doobrow, AL**

"...StellaLife program is helping advance the field of dentistry for my Perio residents at UPENN & Temple. .. faster healing, less discomfort.. & medication."

- **Dr. Stephen Brown, PA**

"A friend had head & neck radiation therapy for cancer. With the help of StellaLife, he was able to minimize getting oral sores & avoid a feeding tube, & it made a difference in his life."

- **Dr. Eric Rindler, TX**

"...We have been using the StellaLife Recovery Kit for years on bone augmentation surgeries. Antimicrobial rinse doesn't stain, & our patients like the taste. Pain-relief Spray & Gel have anti-inflammatory effects & are easy to use. Benefits patients with faster healing & clinicians by reducing the need for pain modalities."

- **Dr. David Lee Hill JR., NC**

"...I want to let you know this is the best product that I've ever had. I have a cancer patient with a Melioidosis that is on chemotherapy. It's the only thing that allows her to eat.."

- **Dr. Joseph McCartin, IL**

"...By combining a 200-year practice with modern technology, StellaLife offer my patients pain relief and a faster recovery...optimal oral health, the natural way..."

- **Dr. Walter Tatch, IL**

"StellaLife is applied to the Aphthous ulcer (canker sore) area with a clean cotton swab....This application can decrease pain... & reduce ulcer duration from 10 to 14 days down to just 2 to 3 days after onset."

- **Dr. Scott Froum, NY**

"...StellaLife for... implant, bone graft... full mouth extraction for an immediate, complete denture... We have decreased the post-operative appointments because of the decreased infection rate."

- **Dr. Robert Heller, OH**

"I love your products & use the recovery kit for my implant & bone graft patients. I use gel for dry sockets & post-operative pain. Perfect for senior patients, easy to use & you can put it in your pocket. I especially love the coconut flavor."

- **Dr. Cathy Hung, NJ**

"It's been said that everything heals in the mouth. But everything heals better with StellaLife"

- **Dr. Nate Estrin, FL**

"StellaLife, my go-to for oral mucositis prevention... (head & neck radiation with or without chemo)... We've given Kits & the patients love them!"

- **Dr. Dennis Abbott, TX**

"VEGA Oral Care has become a standard part of our protocol with both our pre-implant treatment (extractions & site development) as well as with our implant placement for its consistent impact on optimal tissue outcomes."

- **Dr. Steven Rasner, NJ**

"As a family physician, I recommend StellaLife to my family practice patients. I use it following abnormal salivary diagnostic testing, for toothaches, oral lichen planus, oral cancer patients, in advance of oral procedures (biopsy, extractions, crowns) and more. This stuff ROCKS in reducing pain and enhancing healing. I love that it is homeopathic with no known drug interactions and almost no side effects." - **Ellie Campbell, DO**

CLINICIAN'S FEEDBACK

[Read More](#)

"..StellaLife reduces postoperative complications, pain, swelling, suppresses the bacterial growth while enhancing the healing & helps Lichen Planus, Oral Pemphigoid patients get through the day..."
- **Dr. Jin. Y. Kim, CA**

"...Collagen gene & protein increased with StellaLife from fibroblast & bone cells. These are the two main mechanisms of healing, & that's important because you want your bone cells to grow on the implant surface"
- **Dr. Georgios A Kotsakis, TX**

"StellaLife... has scientifically proven, natural, safe & effective products to speed up healing, relieve pain, control bacteria, reduce pain medication..."
- **Dr. DeWitt Wilkerson, FL**

"StellaLife advances healing without staining teeth like CHX...Lichen Planus & auto-immune conditions. StellaLife makes the outcome of the treatment much better.. patients love it, we love it, and the staff enjoys using it every single day."
- **Dr. Sam Bakuri, PA**

"The StellaLife products significantly improve wound healing, patient discomfort, and the treatment of various mucocutaneous disease conditions..."
- **Dr. Farhad Boltchi, TX**

"If we have a patient with Aphthous Ulcers, we keep gel here for our patients & they leave with a gel. If you do a laser procedure, frenectomy, wisdom teeth or any type of surgery, put them on the Oral Care Recovery Kit to reduce pain. They also heal up so much better & faster."
- **Dr. Mark Cannon, IL**

"...My sister tried many products for dry mouth... For the first time in three years, she enjoys the relief of this long-term affliction. StellaLife is short of a miracle!"
- **Linda Miles, CSP, CMC, Oral Cancer Cause**

"...Her life completely changed. Not being able to eat, a lot of pain when she brushes, & a lot of bleeding, to starting to eat pepper & salt, & she's very comfortable. Since then, I've been using it. I'm very happy with the results.."
- **Dr. Thaer Alqadoumi, Loma Linda University, CA**

"...Incorporated StellaLife products as part of the post-operative healing phase for our surgical procedures. Patients report significantly less discomfort & faster healing times after surgery."
- **Dr. Kelly Misch & Dr. Amar Katranji, MI**

"...Excited that we have this product within our armamentarium for our patients... A big difference in healing... Going through about a hundred boxes a month... Everything we heard back from patients was phenomenal..."
- **Dr. Jeremy Ueno, CA**

"...It's been an absolutely amazing product. We've been giving it to all of our all-on-four patients for over a year now, maybe two. And we've seen really rapid healing & less pain associated with the post-operative surgery."
- **Dr. Adam M. Hogan, VA**

"When used prior to cancer treatment, the incidence of mucositis, surgical pain, & swelling is greatly reduced & these patients really appreciate non-narcotic pain relief. The antimicrobial properties of StellaLife make it an excellent choice for patients undergoing periodontal therapy."
- **Kathryn Gilliam, BA, RDH, MAAOSH, HIAOMT**

"...With so much success in speeding healing & reducing post operative pain, we keep testing the limits of this product... I have seldom seen a safe breakthrough product of this magnitude."
- **Dr. Lee Sheldon, FL**

"We use all products for many different procedures, from single to full arch implants, soft tissue grafts, to Laser Periodontal procedures. Increased healing, less post-op discomfort, no staining are just some of the feedback & observations. It has become a daily recommendation to our patients."
- **Dr. Alan Farber, NY**

"...I've been using StellaLife for years now. I started on a patient who always has a lot of pain. So two weeks after that, she came back saying, this is the first time I don't have any pain & I've been using it since then. I recommend it to every patient..."
- **Dr. Ravichandra Juluri, IL**

"...StellaLife, homeopathic therapies consisting of the gel, the rinse, the spray is on our top 20 list."
- **Lora Hooper, BSDH, RDH, EFDA**

CLINICIAN'S FEEDBACK

[Read More](#)

"I had a wisdom tooth removed (#16).. used the StellaLife Kit, starting 3 days prior to the surgery. I did not take a single analgesic for pain. It was a great part of my fast recovery."

- **Dr. Homa Zadeh, CA**

"I love the StellaLife Recovery Kit, because of the extensive pre & post-surgical research. It follows my passion for safe & effective solutions we need for dental implants."

- **Susan Wingrove, BS, RDH**

"...tunneling with ADM & PDGF. What I love about this approach is how natural it looks esthetically right after healing & high patient satisfaction with no morbidity. I use StellaLife for post-op. Patients are very happy. We abandoned CHX years ago."

- **Dr. Saynur Vardar, Nova University, FL**

"....87 year old with tongue cancer... after radiation & chemo, his doctors were amazed that he never had one ulcer throughout his entire treatment. His oncologist, radiologist, & ENT said they have never seen this...."

- **Robin Morrison, Oral Cancer Cause**

"...StellaLife is a game changer for my practice. My team enjoys teaching our patients about the product because results have been outstanding.. The StellaLife team...an invaluable resource."

- **Dr. Lisa L. Miller, AL**

"...My patients report significantly less discomfort adapting to braces while their hygiene & plaque index have improved considerably..."

- **Dr. Yan Kalika, CA**

"I like the idea of StellaLife to deliver a product that can eliminate a reason for a prescription for so many clients. It's nice to give them a healing easy to use product to help heal with that tongue-tie release."

- **Shirley Gutkowski, RDH**

Stella Life products are a perfect complement to my holistic complete health dentistry practice. The patient comfort and speedy healing provided by these products are unlike anything I have ever seen in dentistry. Since I started using Stella Life for surgeries and healing, I have not prescribed an opioid. Not one.

- **Dr. Susan Estep**

CLINICIANS GUIDE AND IMPLEMENTATION CHECKLIST

StellaLife® Clinician's Guide

APPLICATION GUIDE

StellaLife® VEGA® Oral Care Recovery Kit

StellaLife® VEGA® Oral Care Recovery Kits

StellaLife® VEGA® Oral Care Rinses

StellaLife® VEGA® Oral Care Gels

3 • 3 • 3 StellaLife Program

- Start 3 DAYS before the surgery or procedure to increase therapeutic levels.
- Apply 3 TIMES per day, preferably after meals.
- Use all 3 PRODUCTS at the same time in the order outlined below.

Directions

STEP 1 **VEGA® Oral Care Rinse**
Shake well. Swish 3/4 tablespoon (7-10 ml) for 1 minute, spit out

STEP 2 **VEGA® Oral Care Spray**
Spray 4 times under the tongue.

STEP 3 **VEGA® Oral Care Gel**
Apply to the gum at the affected area or procedure site with a cotton swab.

Continue using all 3 products after the surgery or procedure. Refrain from drinking and eating for at least 20 minutes after application. Consult your healthcare professional for use in children under 6 years of age.*

SURGICAL APPLICATIONS

BONE GRAFT PROCEDURES

On-lay Bone Graft • Sinus Lift, GBR

Recovery Kit. Patients start 3 days before and continue for 5-7 days post-operatively. After 7 days, continue to use Rinse 2x/day.

REMOVAL OF IMPACTED DENTITION

Recovery Kit. Refer to how to use Recovery Kit.

IMPLANTS

Recovery Kit or Gel & Rinse. DentaMedica

4-8 weeks prior to surgery start DentaMedica. Rinse, For routine procedures. not involving BG, CTG. Post-op: Patient instructed to rinse for 1-2 minutes and expectorate; immediately apply Gel at the surgical site and vestibule area. Repeat above steps 4x/ day or more (per clinician's discretion) After 5 days, patients are instructed to soak a Q-tip in the Rinse and swab clockwise around the healing abutment for 1 minute, 2-3x/day. Continue for the next 2-3 months during integration, When patients are seen for final check prior to the restorative stage, they are instructed to apply Rinse with a Q-tip at the cervicogingival junction of the future restoration 2x/day as part of routine hygiene.

PERI-IMPLANTITIS

Recovery Kit or Gel & Rinse.

1. For soft tissue inflammation only without bone loss: Remove the cause (debris, cement, etc.). Use 24G angiocath to introduce into the pocket and rinse it out
2. with VEGA Oral Rinse (up to 20 ml). Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Refrain from
3. No eating and drinking for 20 minutes after application. Repeat 3-4x/day for 1 month, then re-evaluate.
4. If bone loss is present: detoxification, implantoplasty, GBR per individual protocol. Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Refrain from eating and drinking for 20 minutes after application.

ROUTINE EXODONTIA

Gel and Rinse Post-op. Patients are instructed to rinse 1-2 minutes and expectorate; immediately apply Gel at the surgical site. Repeat above steps 4x/day.

EXPOSE AND BOND, ORTHO ANCHORAGE PLACEMENT, APICOECTOMY

Recovery Kit. See How to Use Recovery Kit. Alternative, Post-op: Patient instructed to rinse for 1-2 minutes and expectorate, immediately apply Gel at the cervicogingival junction. For best results start 3 days pre-op. Repeat above steps 3-4 x/day for 7 days after the procedure.

Individual results may vary. This material is for general information only and is not intended to be a substitute for professional medical advice, diagnosis or treatment. Read the labels before using.

SCRIP

Gel & Rinse or Recovery Kit. Probiotics Kit.

Post-op: Patient instructed to rinse for 1-2 minutes and expectorate, immediately apply Gel to treated area. Repeat the above steps 4x/day. Home care: Apply the Rinse with a Q-tip at the cervicogingival junction for about 1-2 min with gentle pressure massaging the gum, then immediately apply Gel in the same area. Refrain from eating and drinking for 20 min after application. Repeat 3-4x/day for 1 month, then re-evaluate. Note: To reduce bleeding during the SCRIP, start patients on the regimen 3 days pre-op. See How to use Recovery Kit.

CTG, PERIO & LASER SURGERY, FRENECTOMY, OSSEOUS SURGERY

Recovery Kit. If autogenous tissue is used from the palate, ask patient to apply with Q-tip StellaLife Gel at the harvest site as well as at the recipient site and vestibule area around the surgical site.

1. ABx and intra-op PRP/PRGF/PRF recommendations per clinician's protocol.
2. After initial use of recovery kit regimen, patients should continue to use rinse 2x/day until complete healing is observed.

NON-SURGICAL APPLICATIONS

Dry Mouth: Rinse for 1-2 minutes to relieve dry mouth symptoms. Repeat 3-4 times/day.

Bad Breath / Halitosis: Rinse for 1-2 minutes to eliminate odor-causing bacteria. Use Oral Lozenge in Probiotics Kit at least 1 hr after Rinse to establish healthy oral microbiome. Repeat 3-4 times/day. Probiotics kit is a very beneficial adjunct to the Rinse and should be used together.

Aphthous Ulcers: apply Gel to the ulcer with a Q-tip 5-7x/day. Symptoms/lesions should resolve within 2-3 days. Rinse is a very beneficial adjunct to the Gel and should be used together. Rinse 1-2 minutes, then immediately apply Gel.

Dry Socket: Gel and Rinse. Apply Gel in the office first, allow to take effect for 10 minutes, then check with the patient. They will experience immediate relief. For home care, use Rinse and Gel 4x/day. Rinse 1-2 minutes, then immediately apply Gel.

Orthodontic treatment & Invisalign: Apply Gel into the Invisalign tray for dental pain or apply directly to the gum 3x/day or as needed. Use Rinse for routine hygiene care twice per day. Rinse 1-2 minutes, then immediately apply Gel.

Dental Impressions: Rinse and Gel. Starting 3 days before, Rinse for 1-2 minutes, apply Gel at the cervicogingival junction. Repeat up to 4x/day.

Angular cheilitis: Apply Gel to the affected areas 3x/day until resolves.

Mucositis and Chronic Inflammatory Conditions of Oral Cavity: (inc. **Lichen Planus**) temporary symptoms relief: Rinse & Gel or Recovery Kit 3x/day application for 1 month, then re-evaluate. Rinse and Gel for daily maintenance.

Refrain from drinking or eating for at least 20 minutes after application.

Implementation Checklist

- Log into your StellaLife account with your email. If you need assistance setting up your professional account please reach out to your product specialist.
- Schedule a live learning training session with your product specialist for StellaLife certification
- Incorporate "dummy code" into your software for accounting and tracking purposes.
- Check insurance codes, especially for submission of D9630 (Code for dispensing products). Utilize
- Employ the Insurance Irrigation Code for Hygiene. D4921
- Determine the cost to the patient.
- Decide whether to include the cost in the overall fee or as a separate line item.
- Review the Clinician's Guide to select the procedures for using StellaLife.
- Ensure Peppermint, Coconut Rinse, and Gel is accessible chairside for clinicians to allow patients to pre-rinse/swish/oral irrigation
- During the consultation, explain how StellaLife is integrated into the care plan and how to use it according to the 3.3.3. Program.
- Communicate the significance to the patient by emphasizing that StellaLife is not just another rinse, spray, or gel. Highlight its dual purpose of accelerating healing and alleviating discomfort.
- Encourage the patient to begin using the Recovery Kit three days before the scheduled procedure to minimize harmful bacteria and enhance tissue saturation with anti-inflammatory agents. Also, ensure they continue the regimen for 7-10 days post-operation.
- Arrange for the patient to collect the Kit before the surgery or provide it during the consultation, collecting payment at that time.
- Provide the [DentaMedica consent form](#) as needed.

Hygiene Implementation Checklist

- Pre-Rinse with StellaLife VEGA Oral Care Rinse (2 minute rinse kills pathogens including Human Corona Virus*)
- Provide sub-gingival irrigation with StellaLife Rinse using an endo syringe during Perio Maintenance and SRPs
- Apply StellaLife VEGA Oral Care Gel to treated areas after oral irrigation during SRPs
- Dispense StellaLife Rinse for daily oral hygiene use (keeps pathogens in check, reduces inflammation, bleeding and can help patients stay in remission from perio disease longer (D9630-CDT code for dispensing products))
- Dispense StellaLife Oral Pre+Probiotic for a healthy oral microbiome
- Utilize StellaLife VEGA Oral Care Recovery Kit for SRP patients with risk factors such as diabetes, smokers, also heavy bleeders, anxious patients, etc. The Recovery Kit will safely disinfect, accelerate healing and reduce bleeding, inflammation and anxiety as well as providing some analgesia (HSA and FSA eligible)
- Use StellaLife VEGA Oral Care Gel chairside to apply to lesions such as aphthous ulcers, angular cheilitis, herpes simplex or if hemostasis is needed. Can also be applied to injection sites after administering anesthetic to reduce post-op discomfort.

CHAPTER

FREQUENTLY ASKED QUESTIONS

QUESTIONS & ANSWERS

What is the expiration date?

Guaranteed 2 years from the date of the manufacture and 60 days after opening

What is the Spray in the StellaLife® VEGA® Oral Care Recovery Kit?

The sublingual pain relief Spray is an anti-inflammatory solution. It has 14 active ingredients. It is used sublingually to enter the blood stream faster. It can be applied directly on graft sites. It is part of the Recovery Kit healing system and not sold separately

How much should I price the product?

It is recommended to sell at retail. However, some offices offer it slightly below retail.

Can I get Clinician's Guide for my operatories?

Yes, you can request complimentary laminated Clinicians' Guide for each of your operatory, by emailing Support@StellaLife.com

How long does the Rinse last?

1 bottle= 47 days when using 1x a day
1 bottle= 24 days when using 2x a day
1 bottle= 16 days when using 3x a day

How do patients buy the product?

Compliance is best when the product is dispensed from the office and built into the treatment plan/fee

Can a patient use after 7 days?

Yes, it is a natural and non-toxic product. For some procedures like implants, use beyond 7 days (see Clinician's Guide).

What is the advantage of purchasing online at StellaLife.com?

24/7 access, faster checkout, easy to reorder, free shipping, secure check out, simple access to download invoices and previous orders.

Are there insurance codes?

Yes, we can provide a list of insurance codes via email. The StellaLife® VEGA® Oral Care Recovery Kit & Gel are FSA & HSA approved.

What are the ingredients?

All ingredients and the purpose of each ingredient can be found on the box, the Clinician's' Guide, and/or on our website StellaLife.com.
